360°  
DISINFECTION

KILL 99.9%  
OF BACTERIAS

USB-C  
POWER SUPPLY

COMPATIBLE WITH WIRELESS  
CHARGING ENABLED PHONES

### 2-IN-1 INNOVATIVE AND DESIGN CHARGING STATION

Oblio is a wireless station that sanitizes and charges your smartphone. Its discrete vase-like shape makes it a beautiful design item that can be proudly displayed in a home or office. The design also has the added benefit of encouraging a break from your screen while your phone is being charged and sanitized.

Limiting our exposure to viruses and bacteria is something all appreciate the importance of today. This is why Oblio has been proven through lab testing to kill 99.9% of viruses, including H1N1. Oblio is engineered with ultraviolet light technology (UV-C LED) in its front interior that works as a sanitizer and disinfectant for smartphones. UV-C LED destroy and eradicate the DNA of microorganisms found in viruses, bacteria, mold, and germs. Oblio is designed to sanitize a single surface at a time. For a 360° disinfection, simply flip the phone to expose its second surface for the 20 minute sanitizing period.

Oblio is a Qi-certified, 10W wireless charger, you can fully charge a smartphone in 3 hours. There's also a LED indicator that confirms the correct positioning and charging status of your smartphone.
